

## Parents Rights Declaration ---- Swine Influenza (H1N1) vaccination

**The document presented below sets out and establishes unequivocally, both morally and legally, the position that we the parents of \_\_\_\_\_ hold regarding the administration of any vaccination and in particular any purported H1N1 - swine flu vaccine. It should be noted that this document carries legal force and potentially penalties for its infringement.**

### NOTICE

To the Principal and to all teachers, employees, agents and assistants of \_\_\_\_\_ National School, also of the Department of Education & Science, also of the Department of Social and Family Affairs, also of the Department of Health & Children and of all other departments of the Government of Ireland and of all third parties employed or contracted by such whether temporarily or permanently which may at times be present on the premises of \_\_\_\_\_ National School.

Whereas ~ it is my understanding that Baxter International filed a patent for the H1N1 vaccine on August 28th 2008 ie. 7 months before the supposed discovery of this novel strain of flu.

and whereas ~ it is my understanding that Baxter flu vaccines contaminated with H5N1 – otherwise known as the human form of avian flu, a often fatal biological weapons with a 60% death rate – were received by labs in the Czech Republic, Germany, and Slovenia for distribution in 18 countries in total.

and whereas ~ it is my understanding that production methods make such an occurrence beyond the possibility of being accidental.

and whereas ~ It is my understanding that Baxter International have been contracted to supply H1N1 vaccines to the Irish Government.

and whereas ~ It is my understanding that the H1N1 vaccine contains the adjuvant Squalene.

and whereas ~ the adjuvant squalene has been known for decades to cause severe autoimmune diseases in laboratory animals.

and whereas ~ It is my understanding that squalene was an unapproved ingredient in experimental anthrax vaccines and has since been positively linked to the devastating autoimmune diseases suffered by countless Gulf War vets resulting in severe disablement and tens of thousands of deaths.

and whereas ~ it is my understanding that the squalene in the H1N1 vaccine is between 60,000 and 1 million times more concentrated as that implicated in Gulf War Syndrome.

and whereas ~ Dr. Richard A. Fayrer Hosken at the University of Georgia, has developed a new and completely effective sterilisation tool found to be effective on all mammals, the potential long-term side effects of which are still being compiled.

and whereas ~ the active ingredients of this sterilization vaccine are primarily antigens from PORCINE (pig) glyco-proteins (viruses are a form of glyco-proteins) bonded with a powerful oil-in-water "adjuvant" called squalene.

and whereas ~ Novartis' master patent for the "swine flu" vaccine utilizes swine (porcine) glycol-proteins bonded with the powerful oil-in-water "adjuvant" squalene.

And whereas ~ Novartis' "swine flu" vaccine product information circular, section 8.1, includes this warning paragraph: "Animal reproduction studies have not been conducted with this ---[vaccine]. It is also not known whether the vaccine can cause foetal harm when administered to a pregnant woman, OR CAN AFFECT REPRODUCTION CAPACITY." (Emphasis added.)

and whereas ~ it is my understanding that the H1N1 vaccine contains the glycoprotein-gp120, a major component of MF-59 vaccine adjuvant.

and whereas ~ it is my understanding that this is the same protein fragment isolated from HIV - the virus that is responsible for the rapid dementia seen in AIDS patients.

and whereas ~ it is my understanding that the nutrient solution for the vaccine consists of live cancerous cells from animals.

and whereas ~ it is my understanding that the H1N1 vaccine contains thimerosal, a form of mercury and further that mercury is the second most toxic element for the human body.

and whereas ~ it has come to my attention that individuals within and committees of the United Nations have called on many occasions for the rapid reduction of the human population by figures of between 70 and 85%.

and whereas ~ it is my understanding that such reductions are not achievable by natural process.

and whereas ~ it is my understanding that there exists World Health Organisation memos dating from 1972, (discovered by Patrick Jordan), detailing how to use vaccines to kill people by weakening their immune system, loading their bodies with viruses and creating a massive inflammatory (cytokine) reaction.

and whereas it is my understanding that the H1N1 vaccine is designed to create a cytokine storm within the body, whereby the body's immune system attacks the body itself.

and whereas ~ it is my understanding that investigative medical journalist Jane Bürgermeister has submitted an indictment with the FBI alleging and supplying hard evidence of intended mass genocide using the H1N1 vaccine. ()

and whereas ~ it is my understanding that the pharmaceutical companies have sought and have been granted total immunity from all legal and financial liability in respect of all and any adverse reactions to their vaccines.

and whereas ~ all the above facts are verifiable.

and whereas ~ it is my understanding that in light of the above facts the balance of probabilities is that the true purpose of such a vaccine is to severely disable, sterilise or kill the recipient/s.

and whereas ~ our first responsibility as parents is to protect from all threats and dangers to the life, health and well being of our child.

### **TAKE NOTICE THAT.**

1/ All parental rights are reserved in full.

2/ Under NO CIRCUMSTANCES WHATSOEVER are the school staff to permit the administration of any vaccine whatsoever to our child.

3/ Upon the arrival or upon notification of the intended arrival of any medical personnel carrying the H1N1 or any other vaccine with them WE ARE TO BE NOTIFIED IMMEDIATELY AND WITHOUT DELAY.

4/ Under no circumstances whatsoever, except where specifically agreed by prior arrangement by ourselves in writing, is our child, \_\_\_\_\_ to be removed from the school premises for any medical procedures whatsoever, the exception being emergency first aid or accident treatment, in which case no tetanus vaccination is permitted.

5/ In the event that the Government of Ireland attempts to introduce mandatory vaccination we reserve the right to remove our child from the National School system and his/her attendance at \_\_\_\_\_ National School will cease; his/her education being continued by other means.
